OWASP Kubernetes Top Ten

[Main](#)

About the Kubernetes Top 10

When adopting [Kubernetes](#), we introduce new risks to our applications and infrastructure. The *OWASP Kubernetes Top 10* is aimed at helping security practitioners, system administrators, and software developers prioritize risks around the Kubernetes ecosystem. The Top Ten is a prioritized list of these risks. In the future we hope for this to be backed by data collected from organizations varying in maturity and complexity.

Top 10 Kubernetes Risks - 2025

2025 Top 10 Risks now available Feedback welcome. Please open issues or PRs for changes

- [K01: Insecure Workload Configurations](#)
- [K02: Overly Permissive Authorization Configurations](#)
- [K03: Secrets Management Failures](#)
- [K04: Lack Of Cluster Level Policy Enforcement](#)
- [K05: Missing Network Segmentation Controls](#)

The OWASP®

Foundation works to improve the security of software through its community-led open source software projects, hundreds of chapters worldwide, tens of thousands of members, and by hosting local and global conferences.

Spotlight: Appdome

The Appdome mission is to protect every mobile app in the world at work and play, with billions of users protected today. Appdome delivers the only full lifecycle Unified Mobile App Defense platform with 300+ defenses spanning security, anti-malware, anti-fraud, anti-social engineering, mobile anti-bot, anti-cheat, geo compliance, MiTM attack prevention, code obfuscation, social engineering, and other protections. Automatically build security and privacy in your mobile CI/CD pipelines with Zero Code and No SDKs. Get OWASP MASVS Compliant in less than 5 minutes!
